

Dear Democrats,

On Saturday, June 3, 2017, thousands of delegates convened in Worcester to debate, vote, and collectively decide the key issues that represent who we are as a Party. The swell of unprecedented activism we've seen in the wake of the Trump Administration helped turn this convention into our largest Platform convention yet.

Leading up to the Convention, the Party hosted 11 public hearings and solicited testimony from hundreds of local Democrats, activists, and officials to help our Platform Committee draft an updated Party Platform, which serves as a statement of our values and ideas as Massachusetts Democrats.

Members of the Platform Committee, spearheaded by Former Lieutenant Governor Evelyn Murphy, former Bernie Sanders State Director Paul Feeney, and Suffolk County Sheriff Steve Tompkins, dedicated a great deal of time and effort to make this a Platform that truly reflects the principles and concerns of Democrats from every corner of the Commonwealth.

After a robust debate and the adoption of various amendments, delegates voted to approve the 2017 Massachusetts Democratic Party Platform, our Party's most progressive Platform to date.

This Platform helps mold the vision we have for the Commonwealth. The Party remains committed to channeling the energy we are seeing in cities and towns throughout Massachusetts to help move the Party and our state forward.

Through this forward-thinking, progressive agenda, we will demonstrate that Massachusetts is a leading alternative to President Trump's vision of America.

As Chair of the Massachusetts Democratic Party, I look forward to working with each and every one of you to actively organize and mobilize, fight for our democracy, for the common good, and for all residents of the Commonwealth.

Sincerely,

Gus Bickford
Chair, Massachusetts Democratic Party

MANY VOICES | SHARED VALUES

Massachusetts Democrats believe that every person has the right to live a full, meaningful life with equal access to opportunity, security, and inclusion. We believe that our government exists to empower people by providing high-quality public education, ensuring universal access to healthcare, protecting our environment, reducing income inequality, and guaranteeing equal rights and opportunity for all.

We believe that we are all stronger when our economy works for everyone, and that the extreme level of income and wealth inequality in Massachusetts and the nation makes our communities poorer, poisons our politics, and endangers our future. We believe that when we empower people to organize their local communities, we can change our Commonwealth and our country for the better.

As a united Democratic Party, we will fight for our democracy, for the common good, and for the working families of the Commonwealth. We will grow and strengthen our Party through grassroots organizing and elect Democratic candidates up and down the ticket with strong progressive values. We will fight the regressive Republican agenda at home and in Washington, and will pursue a forward-thinking, progressive agenda of our own to demonstrate that Massachusetts is a leading alternative to President Trump's vision of America.

A healthy democracy is a precursor to achieving all elements of the Massachusetts Democratic Platform, yet the Executive Branch of our national government is exhibiting authoritarian tendencies. Massachusetts Democrats will resist these tendencies and support and protect our democratic institutions to prevent the erosion of our democracy.

This platform is our statement of principles and positions. As Democratic activists, party leaders, and elected officials, we commit ourselves to achieving the goals we set forth in this party platform.

ENVIRONMENT, CLIMATE CHANGE, AND RENEWABLE ENERGY

“This is a wonderful planet, and it is being completely destroyed by people who have too much money and power and no empathy.”

-Alice Walker

Safeguarding the health of our citizens, protecting natural ecosystems, and promoting green economic growth is imperative. To fully protect the environment, we support clean-energy technologies, conservation, and energy efficiency. We recognize the role we play in the climate crisis, which cannot be ignored and needs direct attention and action at all levels of government.

To affirm our commitment to climate justice, neither Democratic candidates nor the Massachusetts Democratic Party shall accept contributions from the fossil fuel industry. For purposes of this platform, the fossil fuel industry includes oil, gas, coal, pipeline companies, plus any other energy provider that actively advocates for new fossil fuel infrastructure within Massachusetts.

- In both the House of Representatives and the State Senate, the selection of committee members and committee leadership should occur through democratic mechanisms.

GENDER AND RACIAL EQUALITY

“I try to teach through my opinions, through my speeches, how wrong it is to judge people on the basis of what they look like, color of their skin, whether they’re men or women.”

-Justice Ruth Bader Ginsburg

We support full equality – regardless of gender or race – and recognize that discrimination against women and communities of color is a pervasive problem in our society. We seek to eliminate all forms of gender and racial discrimination to ensure equal opportunity for all.

-Hilda Solis

All workers – regardless of gender, ethnicity, age, race, religion, income, national origin, disability, sexual orientation, immigration or refugee status – have the right to a quality, family-sustaining job that provides a living wage. The Commonwealth’s transportation and infrastructure systems are a public responsibility and common good. Our system of roads, bridges, ports, airports, rail, transit, bike paths, and walkways need drastic

upgrades to 21st Century standards. Our economy and society are dependent on transportation and infrastructure systems that are well-maintained, connect workers with jobs, and knit together communities throughout the Commonwealth. We believe that transportation investments should promote the creation of housing and employment opportunities, while reducing greenhouse gas emissions and preserving our natural and cultural landscapes.
